BioBlitz 2017: Hyde Park Golf Course, NY

What is BioBlitz?

BioBlitz 2019 Eastern Bluebird, Bay Oaks Country Club, TX

BioBlitz is a fun, free species-counting competition designed to showcase the environmental value of the natural habitats on your golf course.

"Bio," meaning life, and "blitz," a sudden burst of energy combined to form BioBlitz!

Invite golfers and their families, youth groups, community members, and local environmental experts to recognize the positive environmental impacts of golf while enjoying nature and counting plant and animal species located on your property.

Importance

BioBlitz can add to the knowledge of species occurrence and even help document rare species! In our last BioBlitz, participants counted thousands of species.

Not only is this a great way to help your golf course with documenting species, it's also a great excuse to get outside and explore. Let's break the counting record this year!

BioBlitz 2017 Photo Contest Entry by Tom Lamb

Benefits

- Meet Outreach & Education certification & recertification requirements
- Demonstrate your property's environmental value to your community
- Contribute to assessments of biodiversity
- See the trends and status of multiple species over time
- Get outdoors to get some fresh air!
